EDUCATION

Eastern Michigan University
Bachelor of Science, Cybersecurity
• In Progress

Ypsilanti, MI
Aug 2025 – Present

SKILLS

Software Development: AI Agents & Agentic Workflows, MCP & Tool Calling, Claude, Cursor, Salesforce/Agentforce, Microsoft Azure, REST APIs & Integrations, Python, Mobile App Development, Git, CI/CD
Soft Skills: Technical Communication, Cross-Functional Collaboration, Product Discovery, Rapid Prototyping, Problem Solving, Agile Development

EXPERIENCE

Software Developer **Jul 2026 – Present**
Mike Morse Law Firm *Detroit, MI*

- Selected as the firm's first in-house software developer, working directly with founder Mike Morse to turn high-value problems into production software and AI automations.
- Own product discovery, architecture, development, and deployment across AI platforms, APIs, MCP, cloud infrastructure, and internal systems.
- Lead technical adoption of AI and enterprise platforms, architecting workflows and integrations across Salesforce/Agentforce and other AI vendors.
- Partner across legal, operations, and marketing to rapidly prototype and deploy firm-wide solutions, including products intended for commercialization.

Technology Instructor **Nov 2025 – Jun 2026**
Accelerate4Kids *Detroit, MI*

- Designed and delivered hands-on curriculum covering Java, Python, 3D printing, UAV (drone) operation, and additional tech topics based on evolving program needs.
- Assessed individual skill levels and adapted instruction accordingly, resulting in measurable improvements in student coding proficiency and technical confidence.
- Led project-based learning experiences, including coding challenges and drone competitions, increasing engagement and building real-world problem-solving skills.

iOS/VisionOS Developer Intern **Aug 2024 – May 2026**
Apple Developer Academy *Detroit, MI*

- Shipped a consumer iOS app to the App Store and delivered additional TestFlight builds using Swift and SwiftUI.
- Led development and project management across cross-functional teams from user research and ideation through release.
- Translated user needs into polished native features aligned with Apple's Human Interface Guidelines.

PROJECTS

Candle Calculator: WickWise

- Built and launched a native iOS app that helps candle makers save formulas, scale recipes, and calculate production requirements.
- Acquired paying customers and generated revenue, validating market demand and using customer feedback to guide product improvements.
- Owned SwiftUI development, testing, App Store release, support, TikTok marketing, ASO, SEO, and Apple Search Ads.
