EDUCATION

Eastern Michigan University
Bachelor of Science, Cybersecurity
• In Progress

Ypsilanti, MI
Aug 2025 – Present

SKILLS

Software Development: Swift, iOS/VisionOS, Git, App Store Connect, User Interface Design, Concurrency, REST APIs, Agentic Workflows, Testing, Tool Calling, MCP
Soft Skills: Communication, Teamwork, Problem Solving, Rapid Prototyping, Agile Methodologies

EXPERIENCE

Software Developer **Jul 2026 – Present**
Mike Morse Law Firm *Detroit, MI*

- Selected as the firm's first in-house software developer, working directly with founder Mike Morse to identify high-value problems and turn them into internal products and automations.
- Own product discovery, architecture, implementation, vendor evaluation, testing, and deployment as a one-person product engineering team.
- Partner with legal, operations, marketing, and outside vendors to build firm-wide software, including products intended for eventual commercialization to other law firms.
- Use Claude, Cursor, agents, custom skills, MCP integrations, and targeted research to shorten development cycles and move rapidly from an idea to working software.

Technology Instructor **Nov 2025 – Jun 2026**
Accelerate4Kids *Detroit, MI*

- Designed and delivered hands-on curriculum covering Java, Python, 3D printing, UAV (drone) operation, and additional tech topics based on evolving program needs.
- Assessed individual skill levels and adapted instruction accordingly, resulting in measurable improvements in student coding proficiency and technical confidence.
- Led project-based learning experiences, including coding challenges and drone competitions, increasing engagement and building real-world problem-solving skills.

iOS/VisionOS Developer Intern **Aug 2024 – May 2026**
Apple Developer Academy *Detroit, MI*

- Shipped a consumer iOS app to the App Store and delivered additional TestFlight builds using Swift and SwiftUI.
- Led development and project management across cross-functional teams from user research and ideation through release.
- Translated user needs into polished native features aligned with Apple's Human Interface Guidelines.

PROJECTS

Candle Calculator: WickWise

- Built and launched a native iOS app that helps candle makers save formulas, scale recipes, and calculate production requirements.
- Acquired paying customers and generated revenue, validating market demand and using customer feedback to guide product improvements.
- Owned SwiftUI development, testing, App Store release, support, TikTok marketing, ASO, SEO, and Apple Search Ads.
